Expand the Benefits and Capabilities of Microsoft Dynamics®

A Proven and Trusted Source since 1994

Distribution, Accounting, and Warehouse Management Expertise

Seamless Integration with Microsoft Dynamics®

Operations Core

Operations Core

Make Dynamics GP the powerful distribution system you've been looking for. *Operations Core* provides seamless, real-time integration with warehouse systems and EDI services, and adds a pallet full of essential distribution features to Dynamics GP. The result is a system that truly allows you to run your distribution operations the way you want.

- Expanded data: Putaway, picking, and delivery instructions; store names; item dimensions by UofM; country of origin
- Improved business rules: Customer freight options; additional backorder rules; improved use of process holds
- Enhanced workflow: Detailed shipping inquiry, with carton-level, searchable information; auto posting for most document types
- Additional document types: Vendor PO Acknowledgment; Vendor Shipment; Booking Confirmation

Operations Core provides seamless integration with a broad range of Dynamics GP functional areas and Blue Moon products:

> *Dynamics GP: Sales, Purchasing, Inventory, Bill of Materials*
> *(optional) Dynamics GP: Manufacturing, RMA, RTV*
> *Blue Moon: SOP Auto Invoice, Container Management, Advanced BOM, Advanced Allocation, Advanced UDF*

Warehouse Integration

Operations Core provides seamless, concurrent integration with a wide range of warehouse systems, allowing you seamless connectivity, uniform business practices, and high levels of automation within your distribution operation. The result is improved accuracy, efficiency, and customer satisfaction. Any warehouse system may integrate with our XML-based API to gain access to the full array of data and functionality.

Operations Core also offers built-in integration with many leading warehouse systems:

> *Pack and Ship, powered by ShipRush*
> *Warehouse Edge WMS, from Accellos*
> *SCALE, from Manhattan Associates*
> *SOLOCHAIN, from Generix Group*
> *Visual Warehouse, from KARE Technologies*
> *Warehouse Advantage, from HighJump*
> *WarehouseExpert, from Made4Net*
> *3PL (via EDI or direct file transfer)*

EDI Integration

Operations Core provides support for seamless integration for a wide range of Customer, Vendor, Supply Chain and Transportation documents. We've expanded the data available to send and receive with trading partners far beyond native GP and added new document types as needed.

Any EDI provider may easily integrate with our XML-based API to gain access to the full array of data and functionality. *Operations Core* is currently being used to support the following documents:

Customer:	850, 855, 856, 810, 820, 830, 862, 846
Vendor:	850, 855, 856, 810, 301, 310, 315
Supply Chain:	940, 945, 943, 944, 947, 888, 204, 210

Operations Core also offers built-in integration with several leading EDI providers:

> *True Commerce*
> *Redtail Solutions*
> *SPS Commerce*

Certified for Microsoft Dynamics GP
